

## INSTRUCTIONS FOR CLEANING AUTOMATIC FIRE EXTINGUISHING AMPOULES BONPET

1. Ampoule is made of glass and therefore should be handled with care. Do not strike at the glass ampoule and do not drop it on the floor
2. In the case of separation of metal caps and glass ampoules, care should be taken that when re-installing the plastic spacers do not damage the tip (marked with arrow) of the ampoule.

3. Ampoule should be cleaned with liquid detergents and water (you can use also the cleaners for the glass-ceramic hotplates). It should not be rubbed with aggressive powder detergents - also not with the thinner.

**Ampula is not to be cleaned in the dishwasher**
